

Designing Multiplicity

Parsons MFA Design + Technology Thesis Show
Opens May 18th, 2015

Designing Multiplicity is a five day exhibition of more than 80 projects by emerging artists, designers, coders, makers, hackers, educators, and thinkers.

Redefining What's Possible

MFA DT students produce a must-see thesis following a year of intensive research, prototypes, and iteration. Collectively the theses demonstrate insight and experience that explore the evolving, and at times disruptive, role of technology in our lives. Individually, this year's projects focus on themes including storytelling, data, play, health, accessibility and education.

What is MFA DT?

The MFA Design and Technology (DT) program at Parsons examines and extends the intersection of design and technology for practical, playful, theoretical, and artistic impact. Students deepen their practice and theory of design as they critique, leverage, or develop emerging technologies for creative change.

Exhibition, 6 East 16th St, 12th Floor.

Monday, May 18th through Friday, May 22nd. 10AM - 6PM Daily.

Exhibition Reception, 6 East 16th Street, 12th Floor.
